  Cohort for React Developers
  Completed in 2022

About Me

Skilled and enthusiastic ReactJS developer who is passionate about building beautiful and functional user interfaces. I thrive in collaborative environments, sharing ideas and collectively solving problems. With a focus on creativity, I have delivered pixel-perfect designs and captivating animations to engage users. I have a proven track record of turning ideas into exceptional results.

Professional Experience

Elevate HQ || Front End Developer
2022 – Present
- Developing responsive and user-friendly web applications using React, CSS, and HTML.
- Efficiently managed states using Redux Toolkit using reducers
- Collaborating with the design team to ensure the implementation of consistent UI/UX design.
- Integrating APIs and services with React components to provide seamless data flow.
- Writing clean and maintainable code using Git and Github.
- Implementing automated testing using Jest and React Testing Library

DMI Housing Finance || Software Engineer
2020 – 2021
- Created stand-alone, production-grade Spring based Applications using SpringBoot.
- Engineered REST APIs using Data Structures that are easier to maintain and debug during its lifecycle
- Tested developed code using Postman and providing solutions which reduced support calls from 27% to 13% in a span of 3 months.
- Utilized ElasticSearch to monitor production logs and troubleshoot issues
- Managed database(MySQL) using InnoDB engine to ensure error free storage of critical data

Projects

- Coconut - React web application tailored for the fashion industry
- Youthhub - Web application built with React, dedicated to streaming high-quality video content
- GrubGo - Feature-rich React web application designed for seamless food ordering and delivery
- Crypto Portfolio - Backend APIs built on Express
